

# Commercial Horticulture

**BAMA  
SERVICES**

Bama Services is a civil engineering, construction and industrial services business that provides industry-based employment for Indigenous people from across Queensland.

We have an established and significant customer base comprising both private and public sector clients, as well as a track record of executing challenging and remote projects. Bama Services is 100% Indigenous owned, and operated, with a 76% Indigenous base of employees. Bama Services prides itself on the level of expertise that has grown in the foundation area of Horticulture & Ground Maintenance within Bama Services.

## Commercial Horticulture

Bama Services has a proven track record in delivering of a wide range of commercial horticultural and garden maintenance services including:

- Weed and vegetation clearing
- Arboriculture services
- Tree planting
- Tree lopping and pruning
- Stump removal
- Turf laying and grass seeding
- Slashing and mowing
- Litter collection
- Erosion management

The Bama Services team has built strategic alliances with plant manufacturers and has access to a wide selection of earthmoving and supplementary equipment. All equipment is maintained to the highest standard and a comprehensive replacement program ensures modern, low hour equipment is available to our projects.

## Services include:

Bama Services can tailor a solution to your needs in order to maintain:

- Main road corridors
- Rail infrastructure corridors
- Easements
- Parks and gardens
- Estates
- University grounds and resorts

Bama Services is a safe, competent, Indigenous owned and operated, scalable and competitive business that can tailor a solution to your maintenance requirements. When choosing to work with Bama Services we assure you that you are partnering with a low-risk business. This is provided by support and wellbeing services to all its employees through a program that is designed to ensure that each and every employee is fully functional and of sound mind. Through this holistically supportive environment we can guarantee that all measurable project targets are met on time and on budget.
